

The magazine for
success with wind

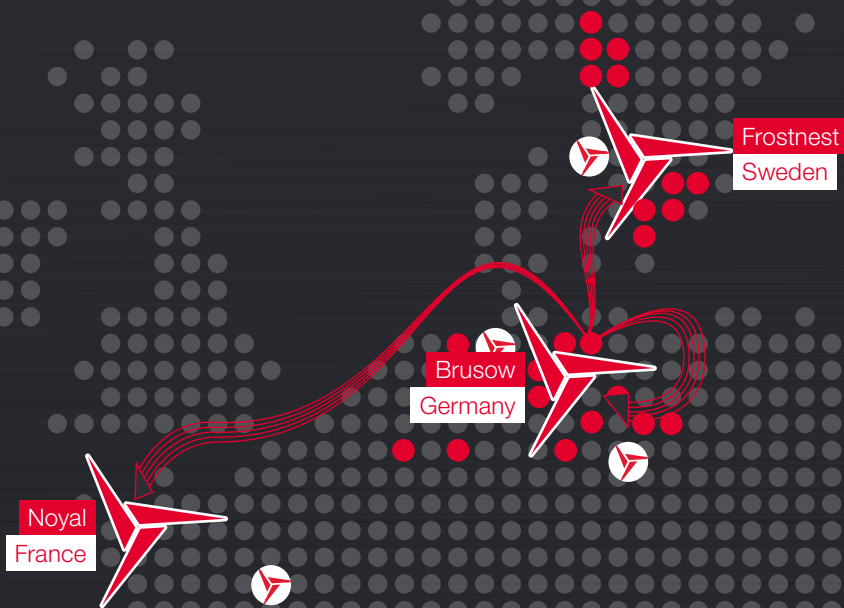

Made in *Germany*

eno energy installation sites in Europe

Over the last few years, we have also laid some excellent groundwork for our European locations outside Germany. This year we'll be producing eno126 wind turbines for France, and after the summer the first enoventum machines for Sweden."

Michael Kabourek
Head of Sales

Full wind power ahead

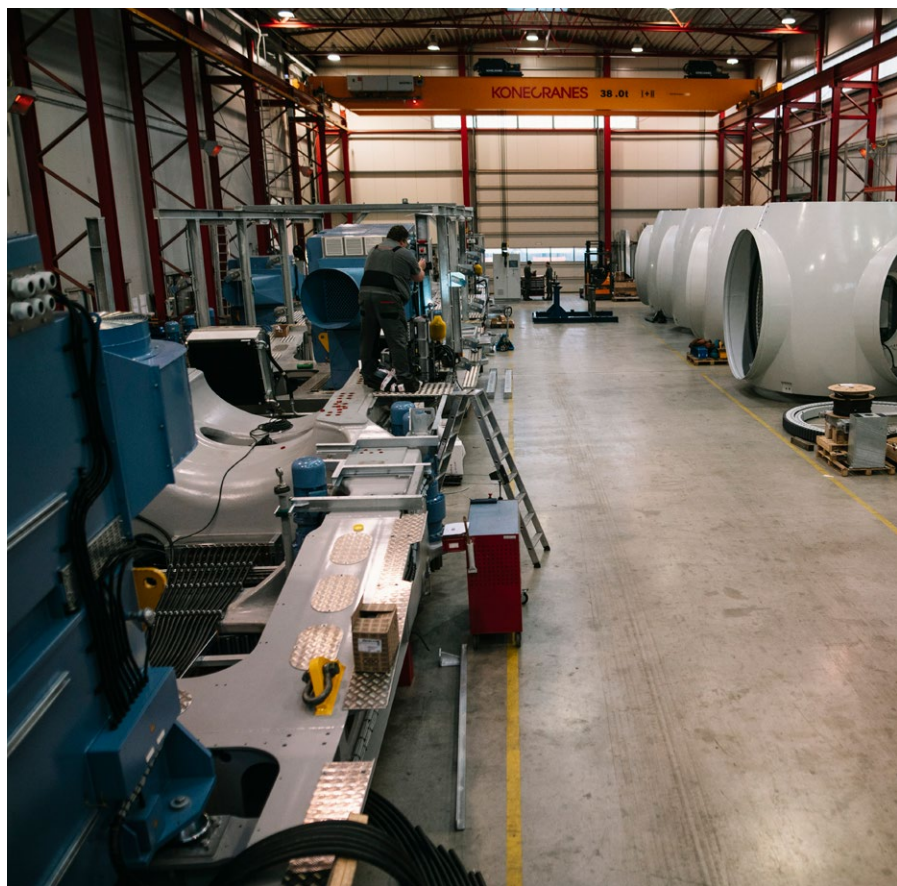

Successful production for Europe

The year began with a busy order book. Our Rostock Hinrichsdorf production site builds wind turbines for the international market.

To enable us to guarantee short delivery times of nine to eleven months for our wind turbines and in view of our buoyant workload, we're planning to expand our production site to boost capacity."

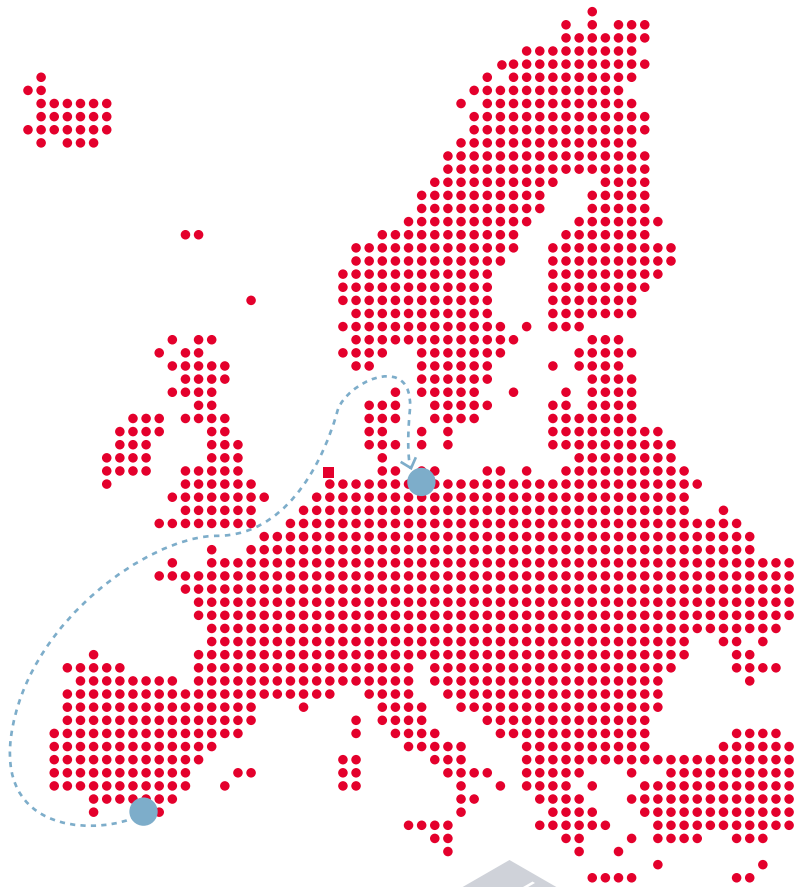

Michael Kabourek
Head of Sales

/ We make it happen!

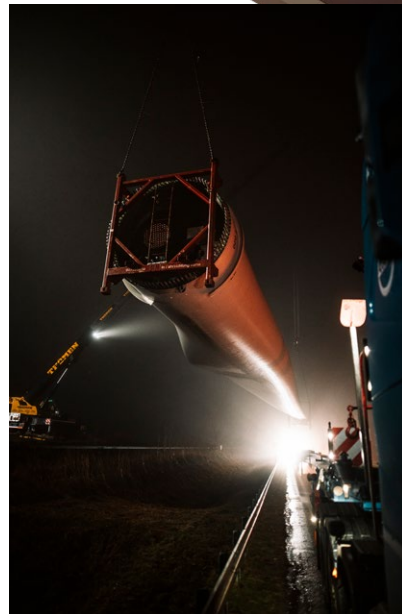

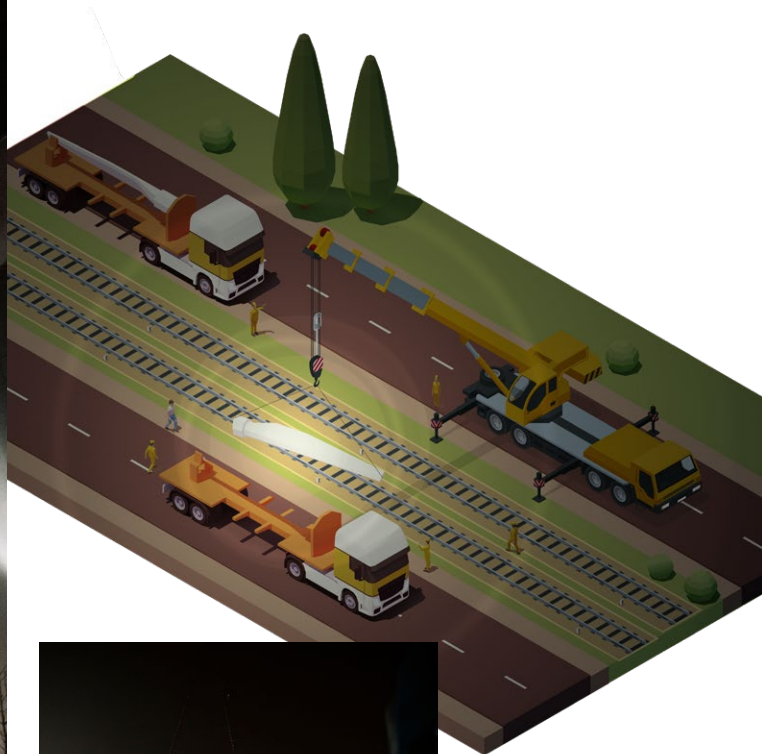

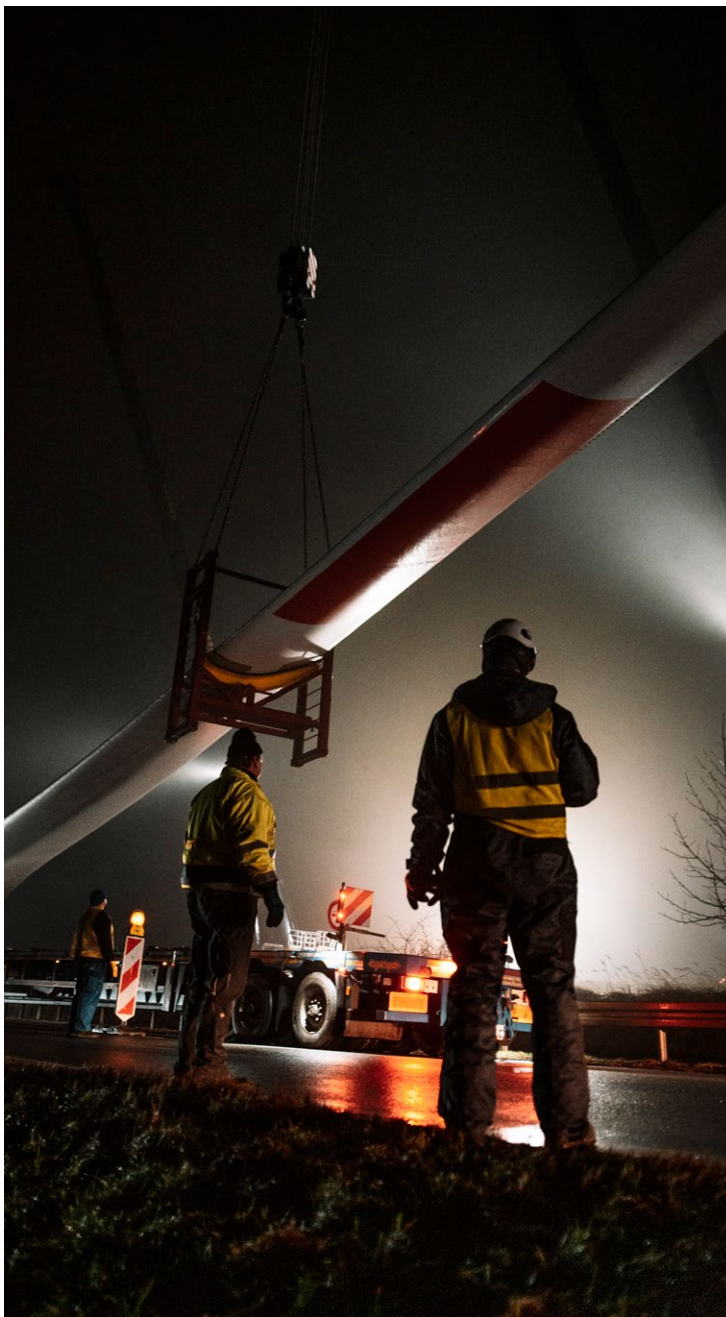

Transporting rotor blades to Brusow wind farm

The *MV BBC Balboa* carried the rotor blades from the Spanish port of Almeria to Rostock harbour.

Then, travelling overnight with a police escort, the blades were transported to the construction site in Brusow. We liaised with the railway authorities to close the line briefly next to the B 105 main road while the rotor blades were lifted over with the aid of two cranes.

Despite the atrocious weather, with intermittent heavy rain and poor visibility due to fog, the narrow time window was successfully used to get the blades to the construction site. Careful logistics planning helped to ensure that the various access and transport challenges were overcome. The turbines at the Brusow wind farm will be connected to the network in April, ready to start producing clean energy for the surrounding area.

/ Happy insurers – happy operators

NW Assekuranz
Global Insurance Broking

Admir Rahimic, account manager for eno energy GmbH at insurance broker Northwest Assekuranzmakler GmbH & Co. KG (NW Assekuranz), speaks to Stefan Bockholt, managing director of eno energy.

Stefan Bockholt: Insurance is all about trust. We were looking for an experienced but innovative partner for the restructuring of our operations. In NW Assekuranz – one of Germany's market leaders – we found a welcoming partner with a compelling concept.

Admir Rahimic: We've long been active in the field of renewable energy and have been in close contact with eno energy for some time. For the overall design of the insurance package for eno, the durable, high quality yet innovative technology behind eno wind turbines helped significantly in our discussions with insurance companies. Reinsurance (warranty insurance) to cover its extensive warranty and maintenance commitments to its customers was especially important to eno. Both our companies come from northern Germany and have the same approach and philosophy when it comes to dealing with complex issues. The openness and transparency of eno energy is a good fit with our own values.

Stefan Bockholt: We are delighted that the sustained long-term growth of our production activities, featuring a national supply chain and "Made in Germany" products, is well received in the insurance market. We're also pleased that NW Assekuranz is able to offer a bespoke and comprehensive framework agreement for operators of our wind turbines. The cover includes machinery insurance with business interruption and a comprehensive liability package.

We look forward to our continued relationship with NW Assekuranz and working with them to develop innovative solutions to meet future challenges around insuring our products.

Admir Rahimic: Mr Bockholt, thank you for our conversation today and for the trust placed in us. We value our working relationship with you and are already looking forward to the next multi-megawatt generation, the eno160, which produces up to 6.0 MW.

10th anniversary Rostock Wind

The countdown is on! Rostock Wind will be celebrating its 10th anniversary on 6 August 2021.

Together with the German Wind Energy Association (BWE) and the German Engineering Federation (VDMA), eno energy is hosting the 10th Rostock Wind event at the height of this summer.

As always, high-quality expert presentations around topical issues await, combined with excellent networking opportunities. The event will be split across two venues. Note that it will not be possible to move between the venues during the event. Further information on the wider programme can be found on our website.

Date:
6 August 2021

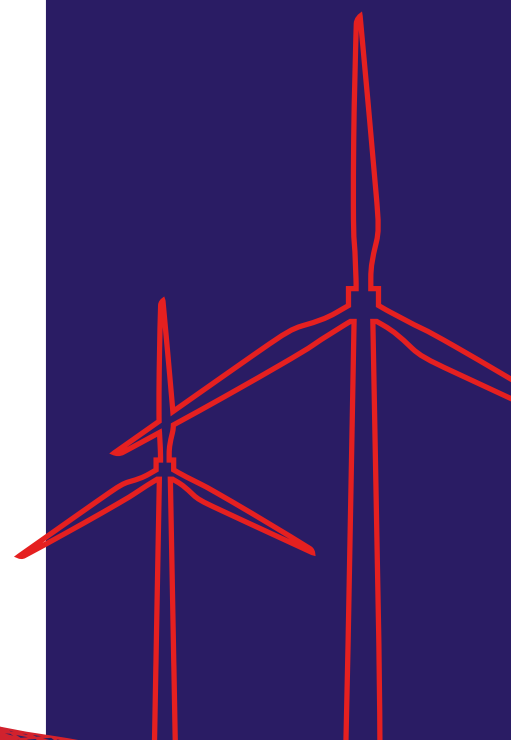

Start time:
9.00 am

Location:
Radisson Blu (registration)
Lange Str. 40
18055 Rostock
Germany

pentahotel Rostock
Galeria Rostocker Hof
Schwaansche Str. 6
18055 Rostock
Germany
